## Code pour les diagrammes

## Cas d'utilisation

```
@startuml
!theme aws-orange
left to right direction
actor Utilisateur as user
rectangle "Application" {
  usecase "Importer Images" as import
  usecase "Appliquer Filtres" as filters
  usecase "Afficher Résultats" as display

user --> import : Utilise
  user --> filters : Utilise
  user --> display : Utilise
}
@enduml
```

## Diagramme de sequence

```
@startuml
!theme aws-orange
actor Utilisateur as user
participant "Application" as app
participant "Interface" as interface
```

database "Base de Données" as database

user -> app : Importe Images activate app

app -> app : Applique Filtres

app -> database : Enregistre Données

app -> interface : Affiche Résultats activate interface

interface -> user : Présente Résultats

deactivate interface

deactivate app

@enduml

## Diagramme de classe

```
@startuml
!theme aws-orange
class ImageProcessor {
- image: Image
+ importImages(images: List): void
 + applyFilters(): void
+ displayResults(): void
}
class Database {
- data: List
 + saveData(data: List): void
}
class UserInterface {
+ showResults(data: List): void
}
ImageProcessor --> Database
ImageProcessor --> UserInterface
@enduml
```
